

1. How I will support delivery of a network of separated, safer cycle lanes as an MP in the city of Brighton & Hove?

I will support the work of the council in their Local Cycling and Walking Infrastructure plan (LCWIP) by seeking to join the working party and by inviting my constituents to have their say on where the best places are for infrastructure changes. I will encourage local working groups to designate what the community needs

2. What I will do to make cycling more accessible, particularly in the parts of my constituency where poor transport is putting people at high risk of social exclusion?

I will promote cycling proficiency courses at schools in these areas. I will work with people who repair bicycles to see if we can repurpose older bikes in disrepair and offer them to people with less money at affordable prices. I suggest low cost workshops for bicycle maintenance where people can learn how to maintain their own bikes.

3. What I will do to reduce cycle theft

I will campaign for an expansion of bicycle lock up places in high visibility areas where thieves will not be able to operate in the shadows
